

Basic Detail Report

Cogged Stone

Medium

Limestone

Description

Cylindrical. Edge convex. Both faces slightly convex. Cogs are formed by extremely shallow, rounded grooves, approximately .0625" deep and .25" to .375" wide. Ridges are approximately .5" to .75" wide and are rounded.

Specimen is in nearly perfect condition. Sketch on back. 11 cogs.

Dimensions

1 1/2 x 3 1/4 in. (3.8 x 8.3 cm)
