Description

This is a bronze lime container from Laos. Lime comes from grinding up burnt coral or limestone into a fine power. When mixed with ground betel nut, the compound releases alkaloids which have a narcotic effect when they enter the human bloodstream. These containers are usually paired with a stick which is used to serve the lime powder. The usage of the narcotic can have a religious function or be done recreationally. Due to the negative impacts of long-term usage, Laotian consumption has fallen drastically in recent years.
